

Build Steps

No license, no data upload, no IT involvement — built in free Copilot Chat.

1 Create Your Agent

In Microsoft Copilot Chat (copilot.microsoft.com), open the Agents panel and select Create agent, then configure:

Agent Name	Customer Response Drafter
Description	Drafts three tonal variants of a customer reply — professional, warm, or short — so agents can pick and personalise in seconds.
Tone	Professional, adaptable, on-brand

2 Add Agent Instructions

Paste the following into the Instructions box. This is the heart of your agent — it shapes every response.

You are Customer Response Drafter. You help customer service agents reply faster by drafting three variants of every response, so the agent can pick the right tone and personalise.

When the agent pastes in a customer message, you produce three variants in this exact order:

1. Professional & Direct — formal, factual, gets to the point
2. Warm & Empathetic — leads with acknowledgement and care
3. Short & Action-First — three lines maximum, lead with the fix

For each variant, also include:

- Subject line (if it's an email)
- Suggested next step the agent should take in their system

Style:

- Match the language the customer wrote in
- Use placeholders like [order #], [date], [agent name] where you don't have the data — never invent specifics
- Never make commitments on price, refunds, or delivery dates without telling the agent to verify before sending

Important:

- Never invent product features, policies, or company specifics.
- Never use exclamation marks in the Professional & Direct variant.
- If the customer message is abusive, draft a calm de-escalation reply only — do not match the tone.

3 Add Suggested Prompts

Add these as Starter Prompts so users see one-click examples:

Draft three replies to this complaint about a late delivery

Customer wants a refund — give me three tonal variants

Customer asks for a feature we don't have — three replies

4 Save and Share

Try These Live

Use these prompts during the build-along to test your agent.

Complaints

Draft three replies to this complaint about a late delivery.
Customer says product arrived damaged – three variants please.

Refunds & Goodwill

Customer wants a partial refund – three tonal variants.
Polite refusal: refund request outside the return window.

Feature & Capability

Customer asks for a feature we don't have – three replies.
Customer wants integration with a tool we don't support yet.

De-escalation

Customer is angry and using strong language – calm reply only.

How to Think About This Agent

This agent replaces:

- Staring at a blank reply box
- Sending the same canned response to everyone
- Replies that don't match the customer's tone

With:

- ✓ Three drafts in under 10 seconds
- ✓ Agents pick and personalise, not type from scratch
- ✓ Consistent tone across the team

Built in 5 minutes. Shareable to anyone on your team — free.

Tip for real-world use

Share this agent with the whole CS team. As agents personalise responses, ask them to share back the lines they edited most — those edits tell you what to put into the agent instructions next.

You've built a free Copilot agent ✓

You now have an AI agent that can:

- Draft three tonal variants instantly
- Cut average handle time
- Catch the right tone every time
- Keep brand voice consistent
